1. Introduction

The European Merchants Bank's (The Bank) Risk Management and Capital Adequacy Report - Q4/2021 is prepared in accordance with the requirements of the Part Eight of the Regulation (EU) No 575/2013 of the European Parliament and of the Council (the "CRR") and the Commission Implementing Regulation (EU) 2021/637 of 15 March 2021 laying down the technical standards regarding public disclosures by institutions of the information referred to in Titles II and III of Part Eight of the Regulation (EU) No 575/2013.

The Bank is a specialized Bank established in Lithuania that is focusing on innovative international financial services. The Bank's mission is to provide its customers with payment-related products and the knowledge that fulfil their wants and needs at the right price and to allow underfunded SMEs to access the real mid-market interest rates any time they need on a customer-friendly platform. The lending targets of the Bank include the development of micro, small and medium sized business entities.

This document has not been audited and does not form part of the Bank's audited financial statements. It has been attested by the Management Board of the Bank.

2. Risk Governance

2.1 Risk Statement

The Bank's Enterprise Risk Management Policy, Risk Taxonomy, Risk Appetite Statement Policy, and Policy on Risk Organization were approved by the Supervisory Board on June 2nd, 2022. The requirement to articulate risk appetite per risk type is governed by the Enterprise Risk Management Policy and Risk Taxonomy. Risk Appetite Statement Policy specifies the Bank's risk appetite per risk type which is further implemented through the risk limit framework regulated by the Limits & Key Risk Indicators Policy.

The Bank's Risk Appetite Statement Policy specifies the risk appetite for the Bank based on its risk capacity and key risk indicators per risk type as a quantitative measure or a qualitative statement depending on the risk type.

The Bank's risk framework and governance structure are based on the Three Lines of Defense model with clearly defined roles and responsibilities of each level in the organization, governed by means of four overarching policies that define enterprise risk management, risk taxonomy, risk appetite and risk organization (Overarching Risk Policies). These overarching risk policies are supported by individual risk policies for each risk in the risk taxonomy.

The high-level roles and responsibilities in the Three Lines of Defense model are represented below:

Risk control function **Business operations** Internal Audit I Line of defence II Line of defence III Line of defence · Independent assurance of the effectiveness of Ensure that there are appropriate processes and Define the Risk Management Framework, internal control structures in place that aim to covering all material risks which the Bank faces. the first two lines of defence ensure that risks are identified, assessed, Monitor and assess whether the First Line of Independent reporting to the Board and Audit managed, monitored, reported and kept within Defense has adequate and effective Risk the boundaries of the Bank's Risk Appetite and in Advisory role in order to improve the process. Management process and controls in place accordance with the Risk Management Develop and maintain the risk limit and key risk indicator framework structure and definitions Add additional key risk indicators and internal Provide independent risk reporting to the Management Board and the Supervisory Council rules if needed Establish a relevant governance structure and to of the Bank secure those activities comply with internal and Be involved in the evaluation of the impact of external supervisory requirements. material changes and exceptional transactions Provide guidance and training on risk management processes

The Bank has a two-board structure: Supervisory Board which consists of three members and Management Board which consists of five members. Selection of members of the Supervisory Board and Management Board is based on their actual knowledge, skills, and expertise. The Bank does not have separate Risk Committee, Risk Committee functions are carried out under Audit Committee.

Information flow on risk to the Management Board is performed by the Chief Risk Officer. The Bank at least annually evaluates the balance of knowledge, skills, diversity, and experience of the individual Management Board members (and the Head of Administration, where applicable) and of Management Board collectively.

The Supervisory Board approves and oversees the implementation of the Overarching Risk Policies. The Management Board implements the Policies according to powers delegated by the Supervisory Board. The position of risk takers are Supervisory Board members, Management Board members, Credit Committee and Asset and Liability Committee (ALCO) members. Also, the following positions are risk takers regardless of being a member of above boards & committees: Chief Executive Officer, Deputy Chief Executive Officer, Chief Risk Officer, Chief Financial Officer, Head of Treasury, Head of Internal Audit, Compliance Manager, COO.

Renumeration Policy

The Bank's remuneration scheme consists of 3 parts.

- 1) Fixed remuneration component: Fixed remuneration is monthly salary determined in the employment contract which in each case reflects the level of the employee's professional experience, role, responsibilities set by the job description and role charter, principle of remuneration, specific knowledge, skills and competences, the salary budget opportunities.
- 2) Benefits: Benefits may be granted to employees as a long-term or short-term benefits or allowances that may be received by the employees. Benefits are considered as part of the fixed remuneration and in addition, are intended to encourage employee's involvement, loyalty, forming the employer's distinctiveness, increasing its attractiveness, helping to achieve better performance and to provide a competitive overall reward package. Benefits apply regardless of the individual performance of the employees and are irrevocable for the validity of the benefits provided term of office and/or as long as the employee occupies a certain role to which the specific benefit is assigned.
- 3) One-time bonus payments: One-time bonuses might be paid at the initiative and discretion of the employer to motivate the employees without any link to any performance criteria (i.e., new year bonus).

The Bank does not apply variable remuneration; it will be applicable in 2023. The Bank has 16 risk takers. The average salary of the risk takers is gross EUR 6 949 (six thousand, nine hundred, forty-nine euros) as of end of year.

ICAAP information

ICAAP is the bank's internal process to assess its overall capital adequacy in relation to its risk profile and strategy to maintain capital at sound levels. The Bank's ICAAP and ILAAP processes are based on a normative approach. The normative perspective is a multi-year assessment of the Bank's ability to fulfil all its capital-related quantitative regulatory and supervisory requirements and demands, and to cope with other external financial constraints, on an ongoing basis. The normative perspective is expected to consider all material risks affecting the relevant regulatory ratios, including own funds and risk exposure amounts, over the 3-year planning period. Therefore, although its outcomes are expressed in regulatory metrics, the normative perspective is not limited to the economic environment and business strategy but continuity of the Bank, adequate capital (ICAAP), adequate liquidity (ILAAP) and competitive position. The Bank's capital management policies and practices support its business strategy and ensure that it is sufficiently capitalized to withstand adverse market and bank-specific developments.

EU CC1 - Composition of regulatory own funds

EU CCA: Main features of regulatory own funds instruments and eligible liabilities instruments

1	Issuer	European Merchant Bank, UAB 304559043
2	Unique identifier (eg CUSIP, ISIN or Bloomberg identifier for private placement)	N/A
2a	Public or private placement	N/A
3	Governing law(s) of the instrument	Lithuanian Republic law
3a	Contractual recognition of write down and conversion powers of resolution authorities	N/A
	Regulatory treatment	N/A
4	Current treatment taking into account, where applicable, transitional CRR rules	Common Equity Tier 1
5	Post-transitional CRR rules	Common Equity Tier 1
6	Eligible at solo/(sub-)consolidated/ solo&(sub-)consolidated	Solo
7	Instrument type (types to be specified by each jurisdiction)	Ordinary shares
8	Amount recognised in regulatory capital or eligible liabilities (Currency in million, as of most recent reporting date)	15,3 million EUR
9	Nominal amount of instrument	15,3 million EUR
EU-9a	Issue price	The nominal value of a share is 1 euro
EU-9b	Redemption price	N/A
10	Accounting classification	Shareholders' Equity
11	Original date of issuance	N/A
12	Perpetual or dated	Perpetual
13	Original maturity date	No maturity
14	Issuer call subject to prior supervisory approval	No
		N/A
15	Optional call date, contingent call dates and redemption amount	N/A
16	Subsequent call dates, if applicable	N/A
	Coupons / dividends	N/A
47	End Gartes Etherlie	N/A
17	Fixed or floating dividend/coupon	N/A
18	Coupon rate and any related index	N/A
19	Existence of a dividend stopper	No
EU-20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	Discretionary
EU-20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	Discretionary
21	Existence of step up or other incentive to redeem	No
22	Noncumulative or cumulative	Noncumulative
23	Convertible or non-convertible	Non-convertible
24	If convertible, conversion trigger(s)	N/A
25	If convertible, fully or partially	N/A
26	If convertible, conversion rate	N/A
27	If convertible, mandatory or optional conversion	N/A
28	If convertible, specify instrument type convertible into	N/A
29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down features	No
31	If write-down, write-down trigger(s)	N/A
32	If write-down, full or partial	N/A
33	If write-down, permanent or temporary	N/A
34	If temporary write-down, description of write-up mechanism	N/A
34a	Type of subordination (only for eligible liabilities)	No
EU-34b	Ranking of the instrument in normal insolvency proceedings	N/A
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	N/A
36	Non-compliant transitioned features	N/A
37	If yes, specify non-compliant features	N/A
37a	Link to the full term and conditions of the instrument (signposting)	N/A

EU LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

		Applicable amount
1	Total assets as per published financial statements	87.325
2	Adjustment for entities which are consolidated for accounting purposes but are outside the scope of prudential consolidation	
3	(Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference)	
4	(Adjustment for temporary exemption of exposures to central banks (if applicable))	
5	(Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting framework but excluded from the total exposure measure in accordance with point (i) of Article 429a(1) CRR)	
6	Adjustment for regular-way purchases and sales of financial assets subject to trade date accounting	
7	Adjustment for eligible cash pooling transactions	
8	Adjustment for derivative financial instruments	590
9	Adjustment for securities financing transactions (SFTs)	
10	Adjustment for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)	
11	(Adjustment for prudent valuation adjustments and specific and general provisions which have reduced Tier 1 capital)	
EU-11a	(Adjustment for exposures excluded from the total exposure measure in accordance with point (c) of Article 429a(1) CRR)	
EU-11b	(Adjustment for exposures excluded from the total exposure measure in accordance with point (j) of Article 429a(1) CRR)	
12	Other adjustments	- 1.998
13	Total exposure measure	85.917

EU LR2 - LRCom: Leverage ratio common disclosure

		CRR leverage r	atio exposures
		31 Dec 2021	31 Dec 2020
On-balan	ce sheet exposures (excluding derivatives and SFTs)		
1	On-balance sheet items (excluding derivatives, SFTs, but including collateral)	85.275	48.645
2	Gross-up for derivatives collateral provided, where deducted from the balance sheet assets pursuant to the applicable		
2	accounting framework		
3	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)		
4	(Adjustment for securities received under securities financing transactions that are recognised as an asset)		
5	(General credit risk adjustments to on-balance sheet items)		
6	(Asset amounts deducted in determining Tier 1 capital)	- 4.730	- 818
7	Total on-balance sheet exposures (excluding derivatives and SFTs)	80.545	47.827
Derivativ	e exposures		
8	Replacement cost associated with SA-CCR derivatives transactions (ie net of eligible cash variation margin)		
EU-8a	Derogation for derivatives: replacement costs contribution under the simplified standardised approach		
9	Add-on amounts for potential future exposure associated with SA-CCR derivatives transactions	590	10,6
EU-9a	Derogation for derivatives: Potential future exposure contribution under the simplified standardised approach		
EU-9b	Exposure determined under Original Exposure Method	590	10,6
10	(Exempted CCP leg of client-cleared trade exposures) (SA-CCR)		
EU-10a	(Exempted CCP leg of client-cleared trade exposures) (simplified standardised approach)		
EU-10b	(Exempted CCP leg of client-cleared trade exposures) (Original Exposure Method)		
11	Adjusted effective notional amount of written credit derivatives		
12	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)		
13	Total derivatives exposures	590	10,6

Securities	s financing transaction (SFT) exposures		•
14	Gross SFT assets (with no recognition of netting), after adjustment for sales accounting transactions		
15	(Netted amounts of cash payables and cash receivables of gross SFT assets)		
16	Counterparty credit risk exposure for SFT assets		
EU-16a	Derogation for SFTs: Counterparty credit risk exposure in accordance with Articles 429e(5) and 222 CRR		
17	Agent transaction exposures		
	(Exempted CCP leg of client-cleared SFT exposure)		
18	Total securities financing transaction exposures		
	-balance sheet exposures		
19	Off-balance sheet exposures at gross notional amount	4.782	1.623
	·	4.762	1.025
20	(Adjustments for conversion to credit equivalent amounts)		
21	(General provisions deducted in determining Tier 1 capital and specific provisions associated associated with off-balance		
	sheet exposures)		
22	Off-balance sheet exposures	4.782	1.623
Excluded	exposures		
EU-22a	(Exposures excluded from the total exposure measure in accordance with point (c) of Article 429a(1) CRR)		
EU-22b	(Exposures exempted in accordance with point (j) of Article 429a(1) CRR (on and off balance sheet))		
EU-22c	(Excluded exposures of public development banks (or units) - Public sector investments)		
EU-22d	(Excluded exposures of public development banks (or units) - Promotional loans)		
EU-22e	(Excluded passing-through promotional loan exposures by non-public development banks (or units))		
EU-22f	(Excluded guaranteed parts of exposures arising from export credits)		
EU-22g	(Excluded excess collateral deposited at triparty agents)		
_			
EU-22h	(Excluded CSD related services of CSD/institutions in accordance with point (o) of Article 429a(1) CRR)		
EU-22i	(Excluded CSD related services of designated institutions in accordance with point (p) of Article 429a(1) CRR)		
EU-22j	(Reduction of the exposure value of pre-financing or intermediate loans)		
EU-22k	(Total exempted exposures)

EU LR3 - LRSpl: Split-up of on balance sheet exposures (excluding derivatives, SFTs and exempted exposures)

		CRR leverage ratio exposures
EU-1	Total on-balance sheet exposures (excluding derivatives, SFTs, and exempted exposures), of which:	85.275
EU-2	Trading book exposures	
EU-3	Banking book exposures, of which:	85.275
EU-4	Covered bonds	
EU-5	Exposures treated as sovereigns	47.827
EU-6	Exposures to regional governments, MDB, international organisations and PSE, not treated as sovereigns	
EU-7	Institutions	10.943
EU-8	Secured by mortgages of immovable properties	889
EU-9	Retail exposures	
EU-10	Corporates	24.646
EU-11	Exposures in default	
EU-12	Other exposures (eg equity, securitisations, and other non-credit obligation assets)	970

After the capital increase in January 2021, the Bank has expanded in loans and money market exposures which had a decreasing effect over the leverage ratio.

4. Liquidity Risk

Liquidity risk is defined as the risk of incurring losses resulting from the inability to meet payment obligations in a timely manner when they become due or from being unable to do so at a sustainable cost. Liquidity risk is governed through Risk Appetite Statement Policy, and Liquidity Management Strategy and Policy. The purpose of the Bank's Liquidity portfolio is to provide buffer of high-quality liquid, marketable and unencumbered assets.

The Bank recognizes that its deposit base consists of predominantly financial customers. Concentration, transactional behaviour, and maturity is continuously monitored at bi-weekly ALCO meetings and by KRIs in daily and monthly Risk reports. Intraday liquidity is managed by Treasury Department through the usage of funds deposited in the Bank of Lithuania.

The Bank monitors short and long-term liquidity ratios i.e., Liquidity Coverage Ratio, Net Stable Funding Ratio, and maturity gap to treat liquidity risk.

Liquidity reporting is performed on monthly and quarterly basis to the Bank of Lithuania including Liquidity Coverage Ratio, Additional Liquidity Monitoring Matrix, Net Stable Funding Ratio. Daily and monthly monitoring is performed to ensure compliance with prudential requirements.

Bank uses stress testing in ICAAP&ILAAP and Recovery and Resolution Planning to determine potential vulnerabilities in liquidity planning.

Table EU LIQB on qualitative information on LCR, which complements template EU LIQ1

The LCR promotes the short-term resilience of a bank's liquidity risk profile. It does this by ensuring that a bank has an adequate stock of unencumbered high-quality liquid assets (HQLA) that can be converted into cash easily and immediately in private markets to meet its liquidity needs for a 30-calendar day liquidity stress scenario.

The Bank monitors LCR daily. LCR follows a decreasing pattern due to the Bank's business strategy to work with financial customers. The Bank provides financial services to EMI/PIs on an increasing level. Correspondent banking services are rather limited. Concentration on funding sources constitutes of mostly financial clients demand deposits and retail term deposits. Increasing trend in retail deposit supports the funding of The Bank. To compensate the high outflow rates, the Bank keeps its liquidity buffer in the Bank of Lithuania account. More than half of the total assets are high quality in portfolio. The Bank has only insignificant number of exchange rate derivatives to hedge foreign currency positions. The Bank's currency positions are relatively unimportant and mainly concentrated on USD, GBP, and TRY. Therefore, LCR is not calculated for other currencies.

5. Credit Risk

Credit risk is most simply defined as the potential that a bank borrower or counterparty will fail to meet its obligations in accordance with agreed terms. Loans are treated at Chief Executive Officer, Credit Committee, Management Board, and Supervisory Board authorization levels as per the Credit Decisions Making and Authorization Policy

5.1. Credit Quality

Table EU CRB: Additional disclosure related to the credit quality of assets

The Bank aims to keep its credit risk appetite in line with the risk appetite definition that has been approved by the Supervisory Board as medium risk and manages with a relevant set of KRIs including the total credit exposure to corporate client with risk grades corresponding PD threshold level and higher as a % of total corporate loan portfolio. Another metrics that's been applied as a KRI is the total non-EU country corporate exposure as % of total corporate loan portfolio exposure which is tracked regularly and under management scrutiny by monthly risk reports.

The Bank's takes into account ESG considerations upon credit decision making. While managing the loan portfolio, main consideration is having a balanced portfolio among industries, thus being not overexposed to specific industry segments. This is balanced by 2 sets of KRIs which limit the ratio allocated per each segment within total loan portfolio.

Main client segments of the Bank are manufacturing, agriculture, wholesale and retail trade, transportation, rental and leasing, real estate, and construction. On the other hand, in its expansion plans, Bank favours innovation and digitalization, sustainability and SME competitiveness in line with its growth strategy.

The Bank does not have any impaired loans.

Impairment of loans is recognized in the Bank— on an individual basis — in three stages under IFRS 9: Stage 1, Stage 2, Stage 3.

- Stage 1: when a loan is originated, Expected Credit Losses1 (ECL) resulting from default events that are possible within the next 12 months are recognised (12-month ECL) and a loss allowance is established. On subsequent reporting dates, 12-month ECL also applies to existing loans with no significant increase in credit risk since their initial recognition. Interest revenue is calculated on the loan's gross carrying amount (that is, without deduction for ECLs). In determining whether a significant increase in credit risk has occurred since initial recognition, a Bank is to assess the change, if any, in the risk of default over the expected life of the loan.
- Stage2: if a loan's credit risk has increased significantly since initial recognition and is not considered low, lifetime ECLs are recognised. The calculation of interest revenue is the same as for Stage 1.
- Stage3: if the loan's credit risk increases to the point where it is considered credit-impaired, interest revenue is calculated same as for Stage 1 and Stage 2. Lifetime ECLs are recognized, as in Stage 2.

12-month ECL is the portion of lifetime ECLs associated with the possibility of a loan defaulting in the next 12 months. It is not the expected cash shortfalls over the next 12 months but the effect of the entire credit loss on a loan over its lifetime, weighted by the probability that this loss will occur in the next 12 months. It is also not the credit losses on loans that are forecast to actually default in the next 12 months. If an entity can identify such loans or a portfolio of such loans that are expected to have increased significantly in credit risk since initial recognition, lifetime ECLs are recognized.

According to Credit Monitoring and Administration Procedure, if the customers do not pay the principal or interest or commitment fee or more than one of them, they are obliged to pay to the bank on time, they are deemed to be in delay and the loan called "past due loans" from the 1st delay day. Customers who are in delay are monitored daily through delay lists and actions to be taken are determined with Credits, Sales. Bank actions are specified in the procedures in accordance with the banking legislation.

Days	Obligatory Actions
2 20 1	Relationship Manager calls to the customer to clarify the situation. If the
3 – 30 days	customer indicates concrete day of covering the debt but the overdue is not
	covered on by that day, the Relationship Manager calls this day and clarifies
	reasons of the overdue. Sending reminder letter to the customer.
	Repeated call, an analysis on reasons of overdue and possible credit
30 – 60 days	restructuring. Sending reminder letter to the customer. An active cooperation
	with the customer regarding search for solution.
60 – 90 days	Sending warning letter if no other written agreements for debt payment were
	signed with the customer.
>90 days	Initiating enforcement procedures.

When an Early Warning Indicator has been triggered for closer monitoring and further investigation (whether the customer is past dure or not) immediate action shall be taken in accordance with the credit risk policies and procedures of the Bank. The designated functions shall perform an analysis in order to assess the severity of the triggered event and to propose suitable action and follow-up. This analysis shall, without undue delay, be presented to the relevant credit decision-makers designated in the Credit Decision making and Authorisation Policy. Relevant credit decision-makers should, based on the abovementioned analysis and other relevant accessible information, decide on the appropriate next steps. The decision should be documented and should be communicated to relevant parts of the Bank for action and follow-up. In any case above 30+ past due loans are taken into watch list.

Past due more than 30 days of any customer's financial instrument is also taken into stage 2. And after 90 days it transferred to stage 3.

In accordance with the EBA Guidelines on credit risk management practices and accounting for expected credit losses (EBA/GL/2017/06), uncollectability is recognised in the appropriate period through loss allowances or write-offs. When the Bank has no reasonable expectation of recovering contractual cash flow of the exposure it leads to a partial or full write-off of the exposure (IFRS 9.B3.2.16.r).

According to CRR, the columns "of which non-performing" and "of which loans and advances subject to impairment" in EU CQ5, are applicable to institutions with a threshold ratio on Non-performing loans and advances (NPL ratio) of 5% or above for three quarter. The Bank's NPL ratio is 0%

EU CQ6 - Collateral valuation - loans and advances,

According to CRR, EU CQ6 is applicable to institutions with a threshold ratio on non-performing loans and advances (NPL ratio) of 5% or above. The Bank's NPL ratio is 0%.

5.2. Credit Risk Standardised Approach

Disclosure of the use of the standardised approach

The Bank adopts the standardized approach to calculate the capital requirements for credit risk. The Bank nominates three external credit assessment institutions (ECAIs): Standard & Poor's, Moody's, and Fitch. Exposures classes for which each ECAIs used are exposures to institutions and exposures to corporates.

Standardised Approach: Mapping of ECAIs' credit assessments to credit quality steps

Long term mapping

5.3 Counterparty Credit Risk

Counterparty credit risk (CCR) is the risk that the counterparty to a transaction could default before the final settlement of the transaction's cash flows. The Bank applies "Original exposure method" as per CRR Article 282. The Bank performs forward transactions to hedge foreign exchange risk. Counterparty credit risk is calculated in line with CRR Article 282 (3)(b) and (4)(b)(iii).

6. Market Risk

Market risk is defined as the risk of losses arising from movements in market prices. The Bank is not involved in trading activities on its behalf, nor it has a trading book. Market risk in practice corresponds to foreign exchange risk, which is monitored daily. The Bank applies CRR Article 351 and calculates own funds requirement for foreign exchange risk when its open position exceeds 2% of its total own funds namely CET 1 capital. Bank does not exceed 2% and allocate capital for market risk by the end of year.

7. Interest Rate Risk in the Banking Book

Interest rate risk in the banking book (IRRBB) refers to the current or prospective risk to the bank's capital and earnings arising from adverse movements in interest rates that affect the bank's banking book positions. When interest rates change, the present value and timing of future cash flows change. This in turn changes the underlying value of a bank's assets, liabilities, and off-balance sheet items and hence its economic value. Management Board retains the responsibility of effective management of IRRBB. Bank performs Interest rate gap report regularly in compliance with regulations. Economic Value of Equity (EVE) and Net Interest Income (NII) are monthly calculated and informed to the Management. Detailed stress and scenario analysis are performed in ICAAP/ILAAP process.

8. Operational Risk

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. The Bank does not want to be exposed to Operational Risk. However, this is inevitable since Operational Risk is inherent in all banking products, processes, services, models, functions and IT-systems. The Bank risk appetite for Operational Risk is low, this applies on Risk Type level as well as for all Operational Risk Subtypes. A low-risk appetite means that the Bank shall manage Operational Risk to be resilient and not experience disruptions, reputational impact and operational losses in accordance with the principles set in this Policy. Operational Risk management shall be conducted according to a sound practice.

The Bank uses Basic Indicator Approach (BIA) to treat operational risk from a capital adequacy perspective

EU OR1 - Operational Risk Measurement

Banking activities			Relevant indicator	Own funds requirements	Risk exposure amount		
			31 Dec 2022	31 Dec 2021			
1	Banking activities subject to basic indicator approach (BIA)	8	338	4286	232	2895	
2	Banking activities subject to standardised (TSA) / alternative standardised (ASA) approaches						
3	Subject to TSA:						
4	Subject to ASA:						
5	Banking activities subject to advanced measurement approaches AMA
